Integral Training Program for Security Operators & Officials Mass & Surface Transportation, Aviation & Maritime Security

Introduction

Global terrorism organized crime and worldwide political and economical unrest demand from each organization and in particularly Critical Infrastructure, Key Assets and High Risk Facilities to take and consider security as a primary

important issue.

These 10 days Training Program and workshop is aimed at the officers and key security officials of the Critical Infrastructure such as Public Transportation, Aviation and Maritime. It draws guidelines to the proper organizing for Critical Infrastructure Protection, going through the main components of the security cycle, starting with the Threat Analysis, going through the Risk and Vulnerability Analysis and ending with the Crisis Management and Disaster Recovery methods.

The Training Program is short but quite intensive and includes theoretical and frontal lectures and the Workshop includes practical team work sessions as well as some practical Table Exercises in each item (Re: Mass & Surface Transportation, Aviation & Maritime Security).

The Public Transportation, Civil Aviation and Maritime facilities have been frequent targets of terrorist attacks as well as criminal activities. The nature and characteristics of these systems make them especially vulnerable to terrorism and crime; it consists of a diverse array of facilities as well as related infrastructure. This Training Program is aimed at mass transit operators, airport & aircraft operators and port facility, shipping companies and ship security professionals, providing the participants with the essential tools of terrorism and crime prevention, rapid response to incidents and successful crisis management.
